# Ceramic Aperture Panels

Polydeck's Ceramic Aperture Panels are steel-backed, heavy-duty rubber panels with ceramics designed around the aperture as an integral, high wear solution.

## Features and Benefits:

Best used in highly abrasive applications and high wear applications such as scalping applications, mill/HPGR discharge applications and/or top decks/feed ends.

- Embedded ceramics maintain aperture dimensions to control cut size.
- Ceramics are designed to be segmented to minimize the risk of plugging.
- Ceramic Aperture Panels offer extended wear life in extreme applications.
- Available in square, slotted or HVR aperture shapes in several different material options.
- Dimensions include 12" X12" in, 40mm or 65mm thick with a 3/8" steel back plate.
- Fastening options include 2/ft bolt-down or 3/ft pin & sleeve.
