

Dewatering

If your operation screens with water to maximize efficiency or wash the material, then you have an extra challenge: draining the water from the material to achieve a saleable product.

Polydex—our comprehensive line of modular polyurethane screen panel solutions—is unmatched in the industry for durability, efficiency, value, and lead time. Our products enable you to remove the water quickly and retain the material—all while running at high capacity.

Recommendations:

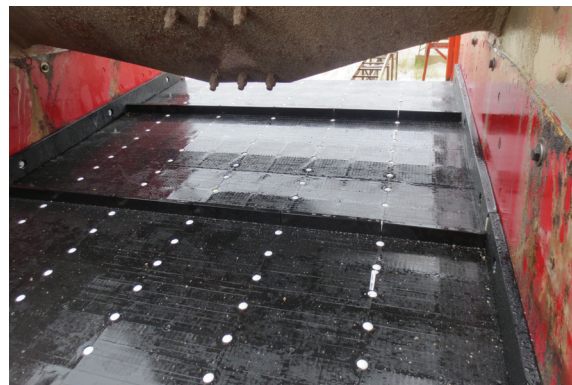

Polydex Modular Screen Panels

- Maxi panel design provides greater open area to drain water (more than any other panel available today)
- Fine slotted openings as small as 0.1mm, with many options in the dewatering range
- Injection molded construction ensures high quality, consistent panels with the fastest delivery time in the industry
- Eliminates porosity/oversize issues and panel collapsing

Options:

Polydeck offers the widest range of dewatering options in the industry.

- Full range of screen panel designs for dewatering applications
- Available as continuous slot panels (0.65mm to 2mm)
- Surface feature integration (dams, restricted flow bars, SSP)
