

POLYDECK®

PROTEX® PTP

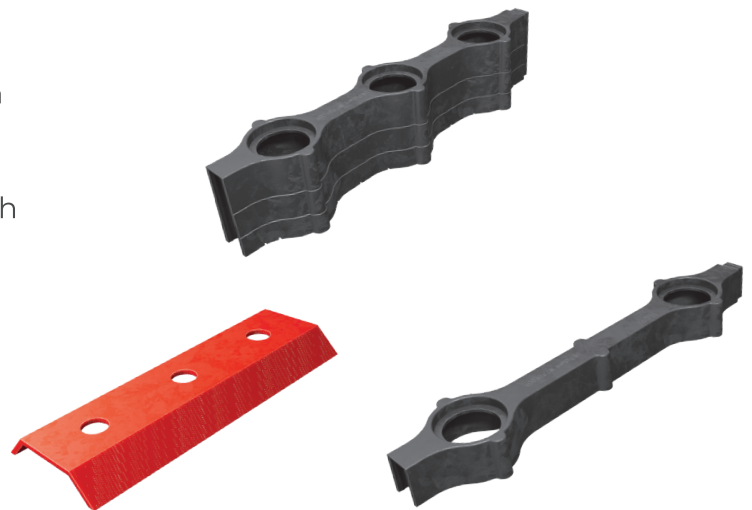

Extend the wear life of PIPETOP Stringers with PROTEX PTP. PROTEX PTP is a molded polyurethane cover that seals and protects each linear foot of the PIPETOP Stringer for steel and PIPETOP ferrule protection.

Features and Benefits:

- Extended protection to stringers in corrosive applications, including high acidity or high salinity
- Economical alternative to replacing stringers by extending their service life with no additional modifications needed
- Mild steel stringers equipped with PROTOPs are up to 58% less expensive than stainless steel stringers
- Overlapping installation helps protect the underlying steel at the seams between each PROTEX PTP
- Especially effective for applications where stringer life is an issue or in combination with high open area panels that allow increased wear on unprotected Stringers.

Specifications:

- PROTEX PTP can be used on PIPETOP Stringers that utilize 2 or 3 PIPETOP Ferrules per foot.
- 2-3/4" tall Stringer allows for Stringer welding for 3" PIPETOP Stringers
- 1" tall PROTOP PTP can be installed on copied Stringers where there are height restrictions.
