

Protect your equipment from premature wear in your most aggressive environments with Polydeck's PROTEX UC.

PROTEX UC is an evenly applied coating that fully seals steel to provide advanced abrasion protection in wet and/or dry applications as well as corrosion resistance in wet applications. Designed as a seamless coat of protection, PROTEX UC is customizable and can be applied to your steel and a wide range of objects including precision area requirements. In corrosive environments, it protects against corrosion by sealing the underlying steel from the slurry.

FEATURES AND BENEFITS

- Apply PROTEX UC onto any steel structure that can be blasted or primed, if you are dealing with corrosive environments in wet applications.
- Rust-inhibiting zinc wash added with primer
- Flame-retardant additives are an option for PROTEX UC.
- The PROTEX UC coat can help you decrease decibels by as much as 5-7 points per millimeter of thickness.
- Best of operating temperatures between -56°C and 95°C, PROTEX UC is also tear and abrasion resistant.
