

Contact us for pricing or additional information.

Our line of injection molded modular rubber media is designed with resilience and durability in mind. Available in multiple rubber formulations, RUBBERDEX is perfect for applications where gouging and abrasion are prevalent.

HOW IT HELPS YOUR PLANT

- Reduces screen operation noise.
- Minimize changeouts in applications with sharp or abrasive materials.
- Prolong maintenance cycles while maintaining high throughput.

PRODUCT FEATURES

- Five different material formulations
- Multiple fastening options
- 1' x 2' modular design
- Adjustable panel thickness (30mm - 100mm)

FASTENING OPTIONS

PolySnap®	Pin
Pin & Sleeve	PolyRail™ (2' x 1')
Bolt-Down

POLYDECK®

RUBBERDEX® XTREME

Contact us for pricing or additional information.

RUBBERDEX XTREME is the latest addition to our RUBBERDEX line of media. Designed with a 3/8" steel plate backing instead of a traditional insert, RUBBERDEX XTREME provides significantly extended service life compared to traditional modular media. Designed for heavily loaded or highly abrasive applications, this product is ideal for combatting panel margin separation and excels under heavy impact conditions where a mixture of large rocks and fines are processed.

HOW IT HELPS YOUR PLANT

- Prevents panel margin separations from fines being impacted into seams.
- Provides bolt-down media level protection in easy-to-handle modular form.
- Extends maintenance cycles and simplifies changeouts.

APPLICATION FIT

- Scalping applications
- Secondary sizing applications

PRODUCT FEATURES

- 1' x 2' panel size for easy changeouts
- Available panel thicknesses ranging from 2" – 4"
- Fits most stringer systems, including angle and tube
- Up to 30% more wear life than typical modular media
- 3/8" (0.375") Gr50 steel plate backing
- Available in 35mm aperture size and up
