additional information.

METALDEX ULTRACLEAN is engineered to deliver more effective cleaning and accurate sizing while increasing available open area.

Features

- Easy pin-style fastening
- Available in 3/32", 1/8", 3/16", 1/4", 5/16", 3/8", 1/2", 9/16", 5/8" aperture sizes
- 1x2 modular screen media

Applications

- Dry, fine-sizing applications for product cleaning or dedusting, elimination blinding or plugging, and increasing throughput
- Discharge ends of decks that are overloaded or not effectively cleaning the product to gain additional throughput

Benefits

- The "zigzag" wire design is oriented across the flow of the screen to enable smaller apertures while providing secondary movement that prevents entrapment of material to eliminate blinding and plugging
- The small gauge wire offers more efficient throughput
- The modularity of the panel allows it to be used without PIPETOP™ media system for competitive open area and easier, lower cost repair and replacement
- Has 6.3" more available screening surface per panel than similar modular wire products, which equates to 3.5' of additional screening area on an 8' x 20' screen deck
